NETAJI SUBHAS INSTITUTE OF TECHNOLOGY

AMHARA, BIHTA

An Ultimate Source of Technology

ENGINEERS' DAY 2026

PPT PRESENTATION COMPETITION

PRESENT YOUR IDEAS SHAPE THE FUTURE

THEME

"Engineering the Future: Technology, Entrepreneurship & Digital Transformation"

TOPICS

- AI & Emerging Technologies
- Industry 4.0
- Startups & Entrepreneurship
- Digital India
- Cybersecurity
- Future of Jobs & Skills
- Technology-driven Business, IoT

DATE
14TH SEPTEMBER 2026
(COMPETITION DAY)

WINNERS ANNOUNCEMENT & FELICITATION
15TH SEPTEMBER 2026
Recognizing Ideas. Inspiring the Future.

PRESENT YOUR IDEAS | INNOVATE BOLDLY | INSPIRE THE WORLD | TRANSFORM THE FUTURE

IDEAS TODAY. IMPACT TOMORROW.

Cyber Security

Guided by Ms. Aastha kashyap

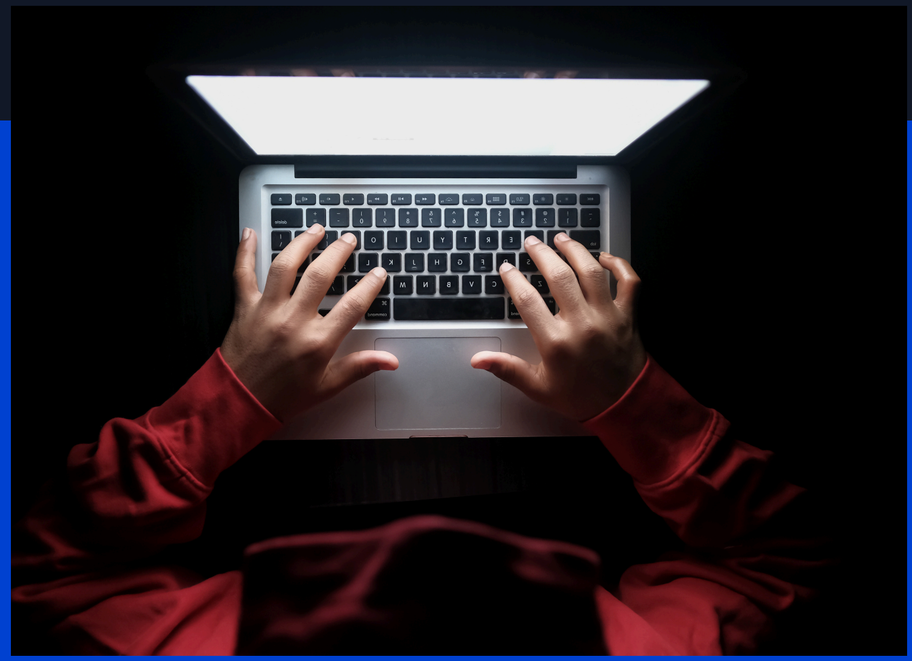
Presented by :- Aditya kumar
Rohit kumar
Keshav karn
Raja kumar

COURSE :- B. Tech (CSE)/Section-B

Introduction

What is Cyber Security?

Cyber Security means protecting computers, networks, devices, and data from hackers, viruses, and unauthorized access.



Cyber Security project

Why Cyber Security Matters

Importance of Cyber Security

- Protects Sensitive Information
- Prevents Cyber Attacks
- Reduces Financial Losses

Cyber Security project

Common Cyber Threats ?

Malware

It is harmful software designed to damage devices, steal data, or gain unauthorized access.

Ransomware

Ransomware is a type of malware that locks or encrypts your files and demands money (ransom) to restore access.

Phishing

where attackers use fake emails, messages, websites, or links to trick people into revealing sensitive information such as passwords, OTPs, bank details, or personal information.

Data Breaches

Unauthorized access to confidential business or customer data.

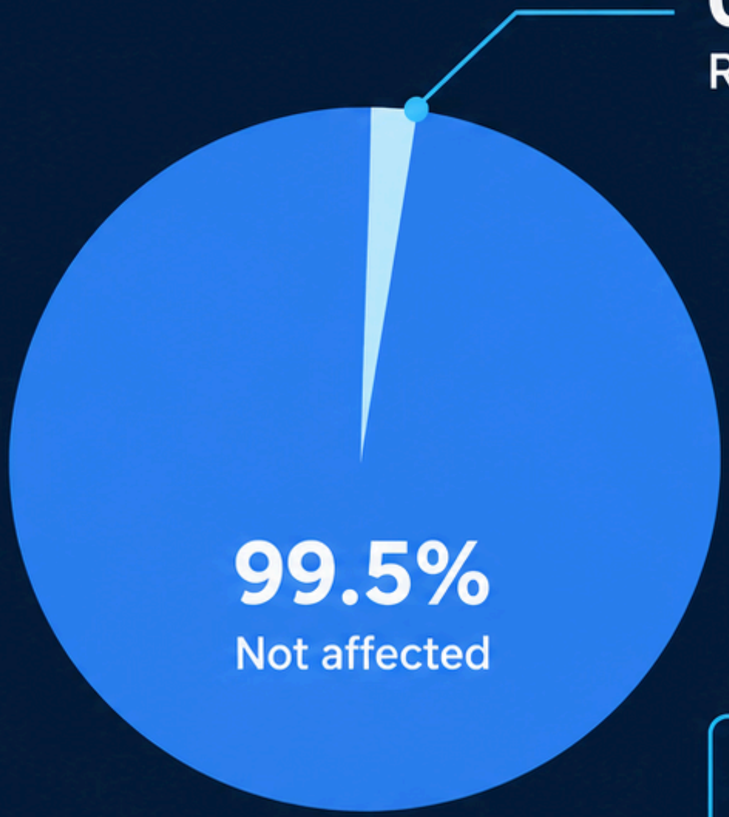
Cyber Security project

Security Solutions

Protection Methods

01. Firewall Protection
02. Antivirus Software
03. Multi-Factor Authentication (MFA)
04. Data Encryption
04. Security Monitoring

Cybercrime Impact in India



Reported victims (0.5%)

Not affected (99.5%)

Nearly 5 out of every **1,000 internet users** in India were reported victims of cybercrime.

≈ 5 out of 1,000 internet users

Cyber Security project

How Can We Protect Ourselves?

Use Strong Passwords

Create unique passwords with a combination of letters, numbers, and symbols.

Enable 2LV

Add an additional layer of protection beyond passwords.

Update Software Regularly

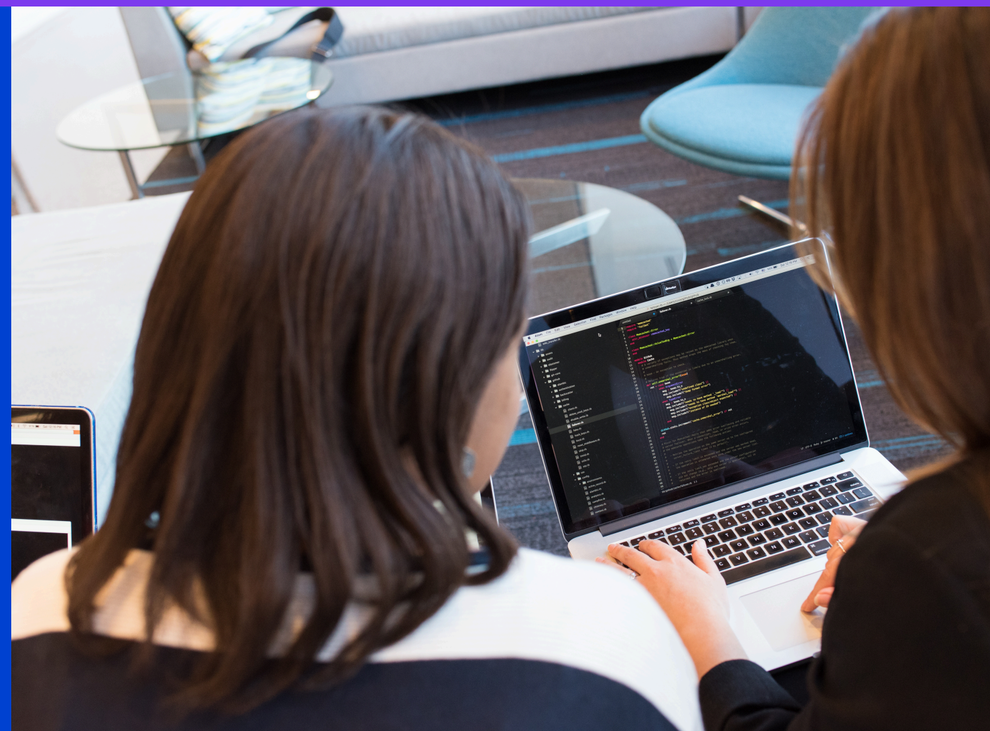
Install updates to fix security vulnerabilities.

Avoid Suspicious Links

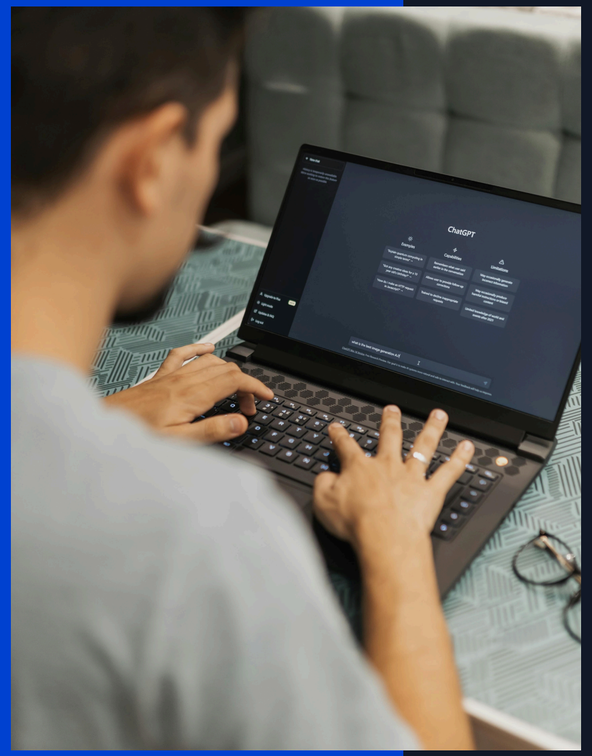
Verify emails and websites before clicking links or downloading files.

Business Impact

- Improved Data Protection
- Regulatory Compliance
- Reduced Operational Risks
- Stronger Customer Confidence



Conclusion



01. **Cyber security is essential to protect data and systems from cyber attacks.**

02. **It ensures privacy and safety of personal and organizational information.**

03. **Awareness, strong passwords and updates are key to stay protected.**

04. **It is everyone's responsibility to create a safe digital world.**
