Digital India

- Empowering a Nation : Transforming India into a digitally empowered society and knowledge economy.

SURYA PRAKASH SINGH

DATE ; 14/09/26

The Core Vision

{ Building a robust Digital infrastructure, delivering governance on Demand, and ensuring total Digital Empowerment of citizens.

Key pillars of Digital India

- **Broadband Highways** : Creating robust , high-speed national networks to connect urban and remote village alike.

- **Universal Mobile Connectivity** : Ensuring fast 4G and 5G network coverage reaches every corner of the country.

- **e-Governance** : Reforming government through technology, making services seamless and transparent.

- **IT for Jobs** : Training youth in critical tech skills to thrive in the modern digital economy.

The Power of UPI

49%

Global real-time Transaction

A Global Leader in Payments

India leads the world in digital payments ecosystem. By 2025-26, the Unified Payments Interface (UPI) processed over 24,000 crore transactions annually.

This immense scale accounts for nearly half of all real-time digital payment volume worldwide, completely revolutionizing retail commerce and peer-to-peer transfers.

Digital Empowerment Initiatives

DigiLocker

A secure digital wallet for citizens. Over 53 crore users actively store, access, and verify their essential documents paperlessly.

UMANG

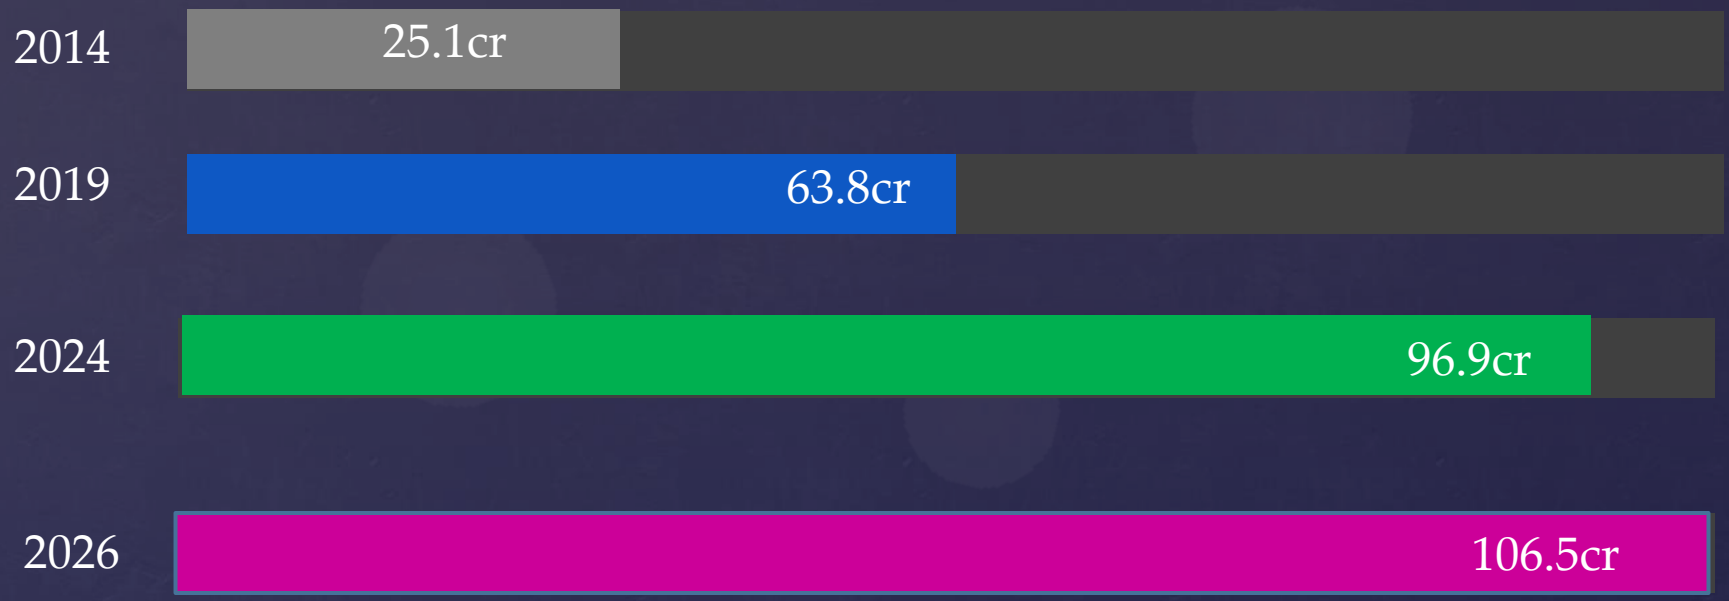

The "Unified Mobile Application for New-age Governance" provides a single gateway to thousands of services in 23 languages.

PMGDISHA

Bridging the digital divide by training over 6.39 crore rural households, making them digitally literate and independent.

Exponential Growth in Connectivity

Total internet subscriptions in crores, intrernet connections have surged over the decade, driving unprecedented digital inclusion across urban and rural landscapes in India.

Bridging the Divide : CSCs

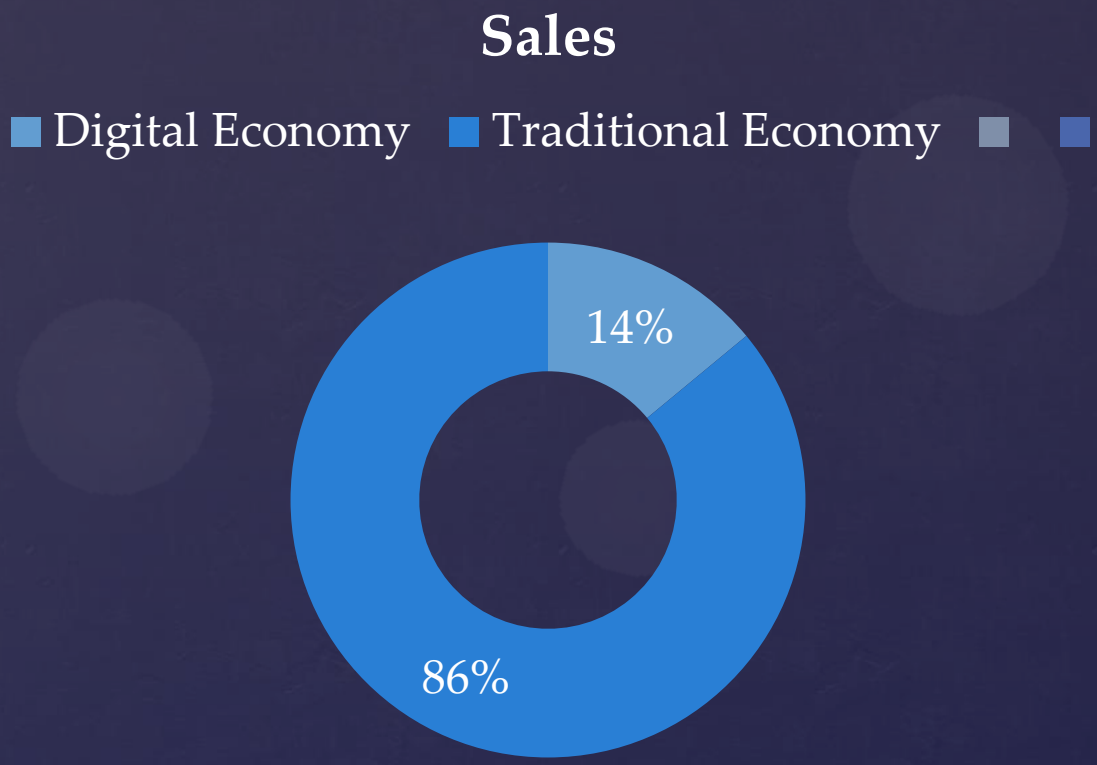

Empowering Rural Entrepreneurs

Over 6.5 lakh Common Service Centres (CSCs) operate across the nation, acting as crucial access points for delivering essential e-governance, banking, and utility services to rural and remote areas.

Run locally by Village Level Entrepreneurs (VLEs), these centers not only bridge the digital divide but also foster grassroots employment and economic independence.

Economics Impact : GDP Contribution

The digital economy has become a major growth engine, rapidly expanding its contribution to approximately 14% of India's GDP, driven by IT services, electronics manufacturing, and e-commerce.

“Digital India has transformed from a foundational initiative to bridge the digital divide into one of the world's largest and most robust Digital Public Infrastructure ecosystems.”

THE DIGITAL TRANSFORMATION JOURNEY

Thank You

Let's build a digitally empowered tommorrow, together.
